

NEIGHBORHOOD ADVISORY

PROJECT UPDATE: ADCLARE AND ROXBORO ROAD WATER MAIN IMPROVEMENTS

Date: December 28, 2005

IMPROVING YOUR WATER SYSTEM

As part of Rockville's ongoing maintenance program, we must periodically replace sections of our water system, which assures you – our customer – continued dependable water service. This work results in more efficient operation of our system. As a customer, your benefit is the assurance that water pressure in your home or business, as well as essential fire protection, will be maintained at all times.

HOW WILL THIS WORK AFFECT YOU?

To accomplish this work, a contractor will come into your area, excavate openings in the street for access to pipes, and lay temporary pipes on the surface. The water meters for the properties that front the project (see map on reverse side for project limits and affected properties) will be disconnected and the service pipe reconnected to the temporary pipe. These properties may experience a momentary disruption in water service while this connection is made. A City Inspector will be assigned to monitor the contractor's work and will be in the area on a regular basis. **We expect to carry out work from April to June 2006. A second advisory will be mailed to you two weeks before construction starts.**

PLEASE . . . WATCH YOUR STEP

If you live or travel in the area, you will notice a number of openings in the street to allow access to the water main and to accommodate the by-pass pipelines running across the intersection and driveways. All openings will be covered during the work and will be resurfaced as soon as possible after the project is finished. Every possible safety precaution will be taken and all work area will be barricaded and carefully marked to prevent injury. You can help by cautioning family and friends to watch their step and avoid the work areas as much as possible.

INCONVENIENCE TEMPORARY. . . IMPROVEMENTS PERMANENT

We realize our project may cause some inconveniences for those who live and work in the area. We will coordinate with all City departments to minimize traffic disruptions, and we will do our best to see that the construction goes smoothly.

IF YOU HAVE A QUESTION . . .

You may contact John Hollida, Rockville Civil Engineer II, at 240-314-8526 or by e-mail at jhollida@rockvillemd.gov.
